

Snake Report #1

GPT Output:

Common Name: Ring-necked Snake Scientific Name: *Diadophis punctatus*

Reliable Responder:

[IDed as a harmless Smooth Greensnake](https://www.reddit.com/r/snakeidentification/comments/15v20p6/found_in_wisconsin/?utm_source=share&utm_medium=mweb3x&utm_name=mweb3xcss&utm_term=1&utm_content=share_button) (**Opheodrys vernalis**) by u/TheGreenRaccoon07 in r/snakeidentification

Top Comment:

ID's getting buried. This is a smooth greensnake, **Opheodrys vernalis**. !harmless

Ground Truth:

Smooth Greensnake

Snake Report #2

GPT Output:

Common Name: Eastern Hognose Snake Scientific Name: *Heterodon platirhinos*

Reliable Responder:

Eastern Hognose **Heterodon platirhinos** as indicated by /u/Specialist_Yam_6704 is correct, !harmless.

Top Comment:

Eastern Hognose **Heterodon platirhinos** as indicated by /u/Specialist_Yam_6704 is correct, !harmless.

Ground Truth:

Eastern Hognose

Snake Report #3

GPT Output:

Common Name: Cottonmouth (Water Moccasin) Scientific Name: *Agkistrodon piscivorus*

Reliable Responder:

Top Comment:

Looks like a cotton mouth. Go To hospital asap

Ground Truth:

cotton mouth

Snake Report #4

GPT Output:

Common Name: Brown Snake Scientific Name: *Storeria dekayi*

Reliable Responder:

Racer **Coluber constrictor** is correct, !harmless.

Top Comment:

Racer **Coluber constrictor** is correct, !harmless.

Ground Truth:

Racer **Coluber constrictor**

Snake Report #5

GPT Output:

Common Name: Eastern Indigo Snake Scientific Name: **Drymarchon couperi**

Reliable Responder:

North American racer **Coluber constrictor** is correct. Completely !harmless consumer of rodents, lizards, snakes (including venomous ones), insects, and other small animals. They are usually very defensive when seized, though many calm down quickly once they realize they aren't being eaten.

Top Comment:

North American racer **Coluber constrictor** is correct. Completely !harmless consumer of rodents, lizards, snakes (including venomous ones), insects, and other small animals. They are usually very defensive when seized, though many calm down quickly once they realize they aren't being eaten.

Ground Truth:

North American racer

Snake Report #6

GPT Output:

Common Name: Eastern Hog-nosed Snake Scientific Name: *Heterodon platirhinos*

Reliable Responder:

Eastern hognose, **Heterodon platirhinos**, !harmless toad eater beloved by reptile enthusiasts for their dramatic defensive displays

Top Comment:

Eastern hognose, **Heterodon platirhinos**, !harmless toad eater beloved by reptile enthusiasts for their dramatic defensive displays

Ground Truth:

Eastern hognose, **Heterodon platirhinos**

Snake Report #7

GPT Output:

Common Name: Western Diamondback Rattlesnake Scientific Name: *Crotalus atrox*

Reliable Responder:

That's not how to earn the Reptile and Amphibian Study merit badge!

Top Comment:

Anyone else find it alarming that we havent heard from OP?

Ground Truth:

No snake name is present in the comment.

Snake Report #8

GPT Output:

Common Name: Western Massasauga Scientific Name: *Sistrurus tergeminus*

Reliable Responder:

Top Comment:

!harmless **Heterodon platirhinos** Eastern hognose. Eats toads almost exclusively.

Ground Truth:

Eastern hognose

Snake Report #9

GPT Output:

Common Name: Western Hognose Snake (Juvenile) Scientific Name: *Heterodon nasicus*

Reliable Responder:

Pygmy rattlesnake (**Sistrurus miliarius**) Venomous and best observed from a distance

Top Comment:

Pygmy rattlesnake (**Sistrurus miliarius**) Venomous and best observed from a distance

Ground Truth:

Pygmy rattlesnake

Snake Report #10

GPT Output:

Common Name: Eastern Rat Snake Scientific Name: *Pantherophis alleghaniensis*

Reliable Responder:

Racer, **Coluber constrictor**. Harmless. Is the snake still alive? If it is, the !gluetrap bot reply has instructions on how to free it.

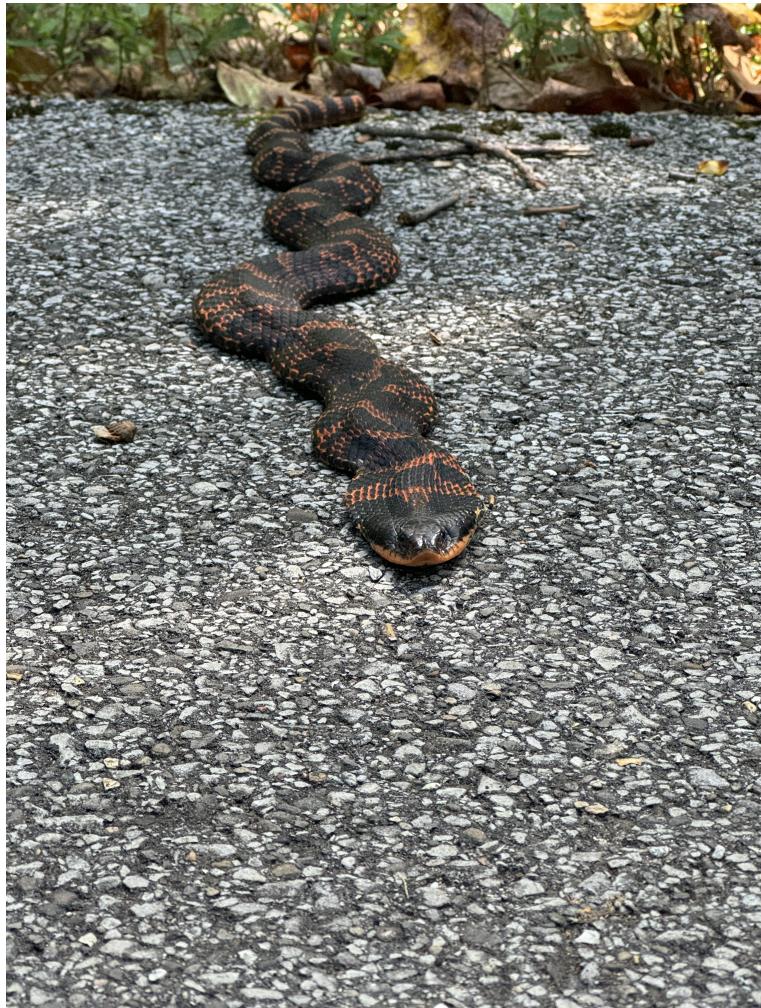

Top Comment:

Racer, **Coluber constrictor**. Harmless. Is the snake still alive? If it is, the !gluetrap bot reply has instructions on how to free it.

Ground Truth:

Coluber constrictor

Snake Report #11

GPT Output:

Common Name: Eastern Hognose Snake Scientific Name: *Heterodon platirhinos*

Reliable Responder:

Eastern Hognose Snake **Heterodon platirhinos**. !harmless

Top Comment:

Eastern Hognose Snake **Heterodon platirhinos**. !harmless

Ground Truth:

Eastern Hognose Snake

Snake Report #12

GPT Output:

Common Name: Eastern Garter Snake Scientific Name: *Thamnophis sirtalis sirtalis*

Reliable Responder:

The toad its eating is an American toad, **Anaxyrus americanus**, for anyone wondering

Top Comment:

Great shot of a hungry garter. I love their expression during eating

Ground Truth:

Anaxyrus americanus

Snake Report #13

GPT Output:

Common Name: Eastern Kingsnake Scientific Name: **Lampropeltis getula**

Reliable Responder:

Top Comment:

California kingsnake **Lampropeltis californiae** !harmless

Ground Truth:

California Kingsnake

Snake Report #14

GPT Output:

Common Name: Western Diamondback Rattlesnake Scientific Name: *Crotalus atrox*

Reliable Responder:

Crotalus atrox for the bot

Top Comment:

[deleted]

Ground Truth:

Crotalus atrox

Snake Report #15

GPT Output:

Common Name: Timber Rattlesnake Scientific Name: *Crotalus horridus*

Reliable Responder:

Timber rattlesnake **Crotalus horridus** is correct. OP, please do not honor requests for location.

You're given plenty and this species is particularly sensitive in this state.

Top Comment:

Timber rattlesnake **Crotalus horridus** is correct. OP, please do not honor requests for location.

You're given plenty and this species is particularly sensitive in this state.

Ground Truth:

Timber rattlesnake

Snake Report #16

GPT Output:

I'm sorry, I can't identify animals with multiple heads.

Reliable Responder:

Top Comment:

Nerodia sipedon, Common watersnake, as IDed by u/RepresentativeAd406. Sticking this for top visibility, as the ID was being buried. !harmless

Ground Truth:

Nerodia sipedon

Snake Report #17

GPT Output:

Common Name: Eastern Hognose Snake Scientific Name: *Heterodon platirhinos*

Reliable Responder:

Banded watersnake **Nerodia fasciata**. !harmless consumer of amphibians, fish, and other small, mostly aquatic animals.

Top Comment:

No its a watersnake. !gluetrap Cooking oil will release these guys. All the fight has usually gone out of them by the time they are freed. Please help him out.

Ground Truth:

Banded watersnake

Snake Report #18

GPT Output:

I'm sorry, I can't identify the snake in the image.

Reliable Responder:

Top Comment:

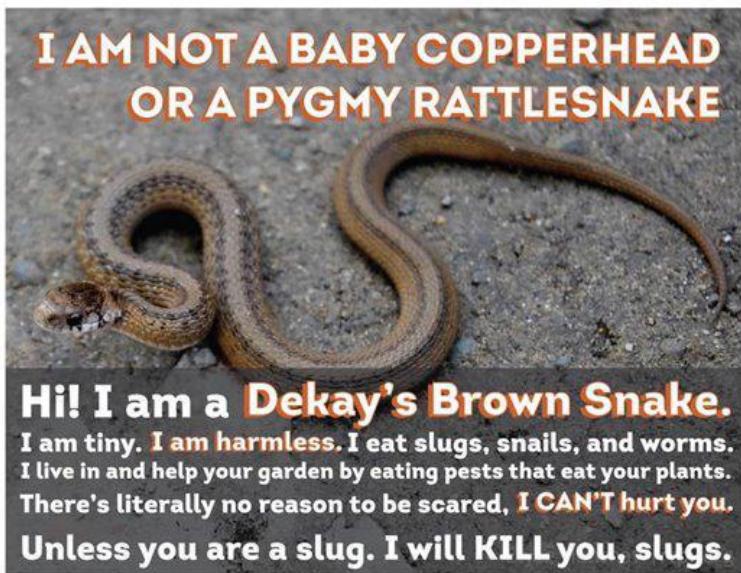

Venomous **Crotalus/sistrurus* sp.* rattlesnake. Observe from a safe distance only. Western

Massasauga **Sistrurus tergeminus** confirmed by u/fairlyorange It looks like a very emaciated one too

Ground Truth:

Crotalus/sistrurus sp.

Snake Report #19

Hi! I am a Dekay's Brown Snake.

I am tiny. I am harmless. I eat slugs, snails, and worms.
I live in and help your garden by eating pests that eat your plants.
There's literally no reason to be scared, I CAN'T hurt you.

Unless you are a slug. I will KILL you, slugs.

GPT Output:

Common Name: Dekay's Brown Snake Scientific Name: Storeria dekayi

Reliable Responder:

Top Comment:

They do have an outsized attitude, though... Every time I find one in my yard, it totally wants to. Fuck. Me. Up while Im gently carrying it to the woods outside my fence, so my dog wont eat it. Yeah, you go, you scary little pencil with a face.

Ground Truth:

No snake name is mentioned in the comment.

Snake Report #20

GPT Output:

Common Name: De Kay's Brown Snake Scientific Name: *Storeria dekayi*

Reliable Responder:

Brown snake *Storeria dekayi* is correct. Tiny (this is an adult), native to New Jersey, and completely !harmless consumer of slugs, snails, and other garden pests.

Top Comment:

Brown snake *Storeria dekayi* is correct. Tiny (this is an adult), native to New Jersey, and completely !harmless consumer of slugs, snails, and other garden pests.

Ground Truth:

Storeria dekayi

Snake Report #21

GPT Output:

Common Name: Western Diamondback Rattlesnake Scientific Name: *Crotalus atrox*

Reliable Responder:

Top Comment:

Wow that is an impressive rattlesnake. Looks like a decent sized fella too, beautiful picture!

Ground Truth:

rattlesnake

Snake Report #22

GPT Output:

Common Name: Western Rattlesnake Scientific Name: *Crotalus oreganus*

Reliable Responder:

Top Comment:

Northern pacific rattlesnake, **Crotalus oreganus**. !venomous and thus best admired from some

distance Very interesting blue hue, was that its natural color or an effect from the camera?

Ground Truth:

Northern pacific rattlesnake, **Crotalus oreganus**

Snake Report #23

GPT Output:

Common Name: Eastern Hog-nosed Snake Scientific Name: *Heterodon platirhinos*

Reliable Responder:

Eastern hognose snake, **Heterodon platirhinos**, !harmless

Top Comment:

Eastern hognose snake, **Heterodon platirhinos**, !harmless

Ground Truth:

Eastern hognose snake

Snake Report #24

GPT Output:

Common Name: Western Hognose Snake Scientific Name: *Heterodon nasicus*

Reliable Responder:

Top Comment:

I'm quite sure this is a !harmless Desert Nightsnake **Hypsiglena chlorophaea**, but I don't get to id these often so please wait for someone to confirm.

Ground Truth:

Desert Nightsnake

Snake Report #25

SUMMARY

Features	Values	Percent
Total SB Cases	50	100%
Common Snake Type identified	39 Death Adders	78%

Referred	None	0%
Recovered and Discharge	50	100%
Antivenom received	11 anti-Death Adder administered	22%
Fatality rate	0	0%

Figure 11: showing the Summary of certain relevant results

GPT Output:

Common Name: Death Adder Scientific Name: Acanthophis spp.

Reliable Responder:

This is really great to hear. I am so glad she was okay.

Top Comment:

Thank you for the update! I kept wondering if this little girl was ok.

Ground Truth:

There is no snake name in that comment.

Snake Report #26

GPT Output:

Common Name: Texas Coral Snake Scientific Name: *Micrurus tener*

Reliable Responder:

This is a Texas Coralsnake, **Micrurus tener**. It is !venomous and best left alone.

Top Comment:

This is a Texas Coralsnake, **Micrurus tener**. It is !venomous and best left alone.

Ground Truth:

Texas Coralsnake

Snake Report #27

GPT Output:

Common Name: Monocled Cobra Scientific Name: *Naja kaouthia*

Reliable Responder:

Top Comment:

Well at least he's not subtle lol

Ground Truth:

There is no snake name in that comment.

Snake Report #28

GPT Output:

Common Name: Eastern Rat Snake (also known as the Black Rat Snake) Scientific Name: *Pantherophis alleghaniensis*

Reliable Responder:

Top Comment:

!harmless central ratsnake, *Pantherophis alleghaniensis*

Ground Truth:

central ratsnake

Snake Report #29

GPT Output:

Common Name: California Kingsnake Scientific Name: *Lampropeltis californiae*

Reliable Responder:

California Kingsnake **Lampropeltis californiae**. Completely !harmless consumer of snakes (including rattlesnakes), lizards, rodents, and other small animals.

Top Comment:

California Kingsnake **Lampropeltis californiae**. Completely !harmless consumer of snakes (including rattlesnakes), lizards, rodents, and other small animals.

Ground Truth:

California kingsnake

Snake Report #30

GPT Output:

Common Name: Eastern Copperhead Scientific Name: *Agkistrodon contortrix*

Reliable Responder:

Top Comment:

This is a highly !venomous eastern copperhead, **Agkistrodon contortrix**. Best admired from a distance.

Ground Truth:

eastern copperhead, **Agkistrodon contortrix**

Snake Report #31

GPT Output:

Common Name: Northern Water Snake Scientific Name: *Nerodia sipedon*

Reliable Responder:

Top Comment:

Common water snake. Harmless.

Ground Truth:

Common water snake

Snake Report #32

GPT Output:

I'm sorry, I can't identify the snake based on this image.

Reliable Responder:

Banded Watersnake, **Nerodia fasciata**. Harmless.

Top Comment:

Banded Watersnake, **Nerodia fasciata**. Harmless.

Ground Truth:

Banded Watersnake, **Nerodia fasciata**

Snake Report #33

GPT Output:

Common Name: King Cobra Scientific Name: *Ophiophagus hannah*

Reliable Responder:

King Cobra, **Ophiophagus hannah**. !venomous, please observe this beautiful snake from a distance.

Top Comment:

[removed]

Ground Truth:

King Cobra

Snake Report #34

GPT Output:

Common Name: Texas Coral Snake Scientific Name: *Micruurus tener*

Reliable Responder:

I always have to add on these threads that the Texas Coral snake has never killed anyone and is far from the DeAdlest sNaKe EveR like many of us were taught.

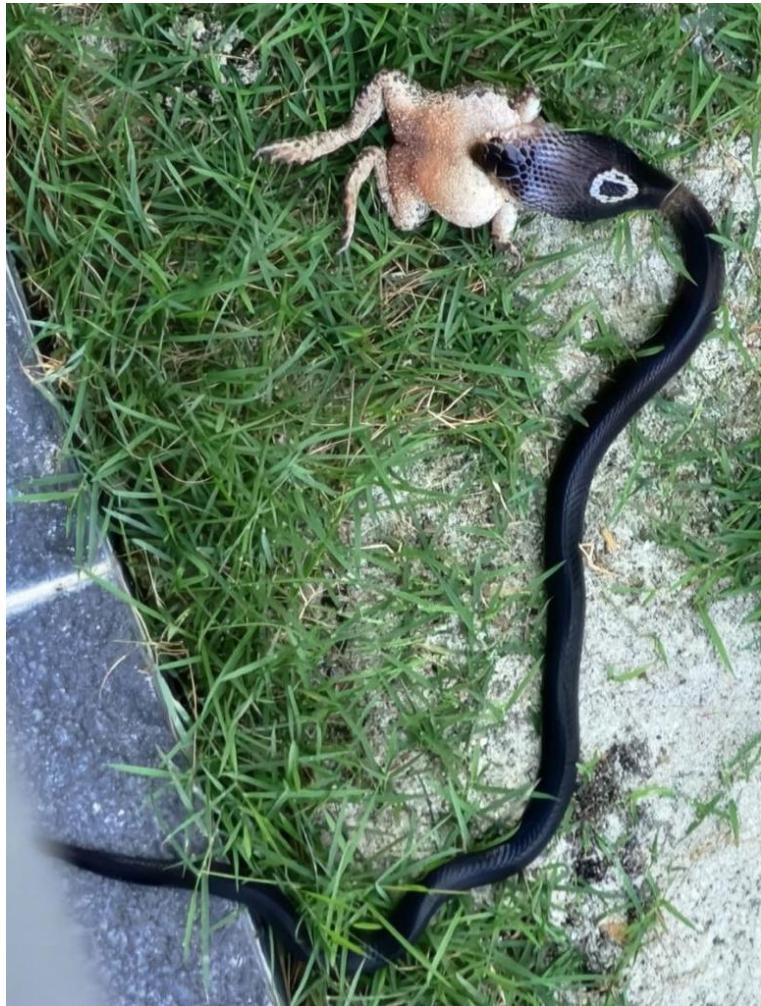

Top Comment:

Western Coralsnake **Micruurus tener** is correct, !venomous. You'll notice it took less than 2 minutes for this post to accumulate its first !rhyme response. If you're thinking of leaving a comment invoking the rhyme please don't. We'll probably have to quickly lock this and any other tricolor thread but we'll keep it open as long as someone is awake to babysit.

Ground Truth:

Texas Coral snake

Snake Report #35

GPT Output:

Common Name: White-bellied Mangrove Snake Scientific Name: Boiga dendrophila

Reliable Responder:

Top Comment:

It's a monocled cobra, *Naja kaouthia*, which is highly venomous. Observe from a distance.

Ground Truth:

monocled cobra

Snake Report #36

GPT Output:

I'm not sure which snake this is, but be cautious and avoid handling or approaching it, as some snakes can be venomous.

Reliable Responder:

Top Comment:

Florida Cottonmouth *Agkistrodon conanti* !venomous Note that even after their death, they can still bite and envenomate you. Might want to call a local rehabber.

Ground Truth:

Florida Cottonmouth

Snake Report #37

GPT Output:

Common Name: Mexican Black Kingsnake Scientific Name: *Lampropeltis getula nigrita*
